

2005 February / March issue edit postscript

H-IIA No. 7 which carried MTSAT-1R is launched safely on February 26, and a sign of a recovery of space relation with Japan and the U.S. is seen by the thing of resuming a flight by the space shuttle in May. The succeeding machine of the "Himawari" which MTSAT-1R of the wish went up and had a blank long especially is scheduled to be realized, and it came to be taken up in TV or newspaper each paper. Thus, I received the manuscript from many directions as usual, and it became a splendid magazine.
