Associate Fellow Dinner

Attending AIAA TCCS, IAC, IAC-DI Meeting and 46th Aerospace Sciences Meeting

Takashi Iida, NICT/JFSC

AIAA TCCS (Technical Committee on Communications System) meeting, IAC (International Activities Committee) meeting, AIAA Board of Directors meeting, Director-International Task Force meeting and 46th Aerospace Sciences Meeting were held at Grand Sierra Resort (formerly Reno Hilton Hotel) in Reno, Nevada from Monday on January 7 to Friday on January 11, 2008. When I arrived at Reno, the snow seemed to be piled up around 20-30 cm. But the weather continued to be fine through the week I stayed, although I did not understand the outside well because I spent only in the hotel for all a week.

The TCCS meeting was held from 9:00 a.m. to past 2:00 p.m. on January 7, and Mr. Houston, Chairperson, Ms. Elizabeth Klein-Lebbink, secretary and other 8 committees including me attended, and several participants were on telephone meeting at the same time. The agenda was shown in the right table.

The meeting focused in the first on the preparation status for ICSSC2008, especially, how many papers were gathered, which started on June 9, 2008 in San Diego until June 12. The number of paper proposals was a little over 100 papers at this time point. Chairperson of ICSSC2008, Dr. Frueholz, Aerospace Corp., wants to have dozens of papers more, and, according to Dr. Frueholz's suggestion, the deadline of paper proposal was postponed until around 10 days. The ICSSC2009 will be held in Edinburgh, Scotland, U.K. and a memorandum was exchanged between AIAA and the Institute of Engineering and Technology. About Awards, three candidates will be recommended by January 31. The candidate must be a contributor not only in a business field but also in a technical field

TCCS Meeting Agenda

1. Introductions
2. TCCS Subcommittee Reports
 - A. Conference Subcommittee
 - a. ICSSC-2008 Planning
 - b. ICSSC-2009
 - c. ICSSC-2010
 - B. Steering
 - Membership news
 - C. Vice Chairman
 - D. Awards
 - E. ICSSC Steering Committee
 - F. Japan Forum
 - G. Treasure Report
3. TCCS Any Other Business
4. Next Meeting
5. Adjourn

under the condition of non-TCCS member for at least two years. Next, I reported JFSC activities in 2007 (see Appendix). In particular, this report included an TCCS approval matter for the revision of By-Law of JFSC. It was discussed whether or not it is appropriate that the By-Law of JFSC allows a non-member of AIAA to carry out same activity as an AIAA members. I explained that if a non-member of AIAA becomes a board member, the AIAA member would recommend him to become a member of AIAA and this action contributes to increase members of AIAA. There was no objection particularly, and the revision of this By-Law was approved. In addition, AIAA announces this time that a style of slide format shown in Appendix is recommended.

I also reported the activity of JFSC in an IAC meeting held on January 8. The IAC Chairperson Mr. Bole of Aerospace Corporation and other 20 committees attended there. The AIAA Board of Directors (BoD) meeting was held on January 11, and AIAA President, Dr. Nielsen and about 30 directors attended. Being to my special impression, it was introduced that there is a criticism that AIAA becomes "old white male" society. This is a problem that should be resolved by diversity including younger generation.

AIAA 46th Aerospace Sciences Meeting (ASM) was held on January 7-10. It is likely that people more than 2000 participated. This meeting is one of biggest AIAA meetings. As for the contents, all about aerospace was concerned, and about 1500 papers were presented in about 180 sessions. An exhibition was taken place, too, but almost all of exhibitions were conducted by using computer display. I attended three next special lectures that have the name of a well-known scholar. They are:

- Dryden Lectureship in Research: Steve W. Squyres, Cornell Univ., "Robotic Exploration on Mars"
- AIAA/SAE William Littlewood Memorial Lecture: Dr. E. M. Murman, MIT, "Lean Aerospace Engineering"
- von Karman Lectureship in Astronautics: Dr. E. J. Weiler, Director, NASA GSFC

As for the second lecture, introducing reports: "Made in America" in 1989, "Machine Changed World" in 1990, "Lean Engineering" in 2002, and Toyota production method, it describes that "lean" thinking is the dynamic, knowledge-driven, customer-found powers through what all people is a defined envelope eliminate waste and create value. According to Lean Aerospace Initiative (LAI) in 1993, NASA's "Faster, Better, Cheaper" is no based on LAI, while F/A-18 E/F project is 25% larger but 47% fewer total parts. Furthermore, the concept of Big room was introduced, which contains Obeya and Genchi-genbutsu. In ASM, Award Luncheon to confer various awards and Associate Fellow Dinner (see photograph above right) to confer a prize on the people who became Associate Fellow were held as usual. I was disappointed that no Japanese became Associate Fellow in this year.

Furthermore, Director-International Special Task Committee Meeting which discusses Director-International issue was held in the afternoon on January 9. Mr. Bole of Boeing who is Vice President international activities, BoD, Dr. Ying of a mediator, Mr. Iasiello of the AIAA, and other 15 people attended. The main issue was how to make clear the role of conventional Director-International and Director-Region VII. An argument to establish Director which specializes in Europe, Asia, and an area like South America was performed.

That is all about report of meetings I attended. Finally I would like to add some information. There is a big change, because the hotel is changed to Grand Sierra Resort, formerly Reno Hilton Hotel. Not only hotel room is changed, but also slot machines on the lobby are placed only back side, instead café or bar increased. There is a conventional steak house, but the family type restaurant which I took breakfast in the past disappeared. In addition, Starbucks was in a lobby floor.

View from hotel room toward airport (left photo) and road traffic at rush hour time (right photo)

Discussion on the Space Fundamental Law <ul style="list-style-type: none"> There is not a law to prescribe a national space policy in Japan. Instead, there is a law of NASDA and/or JAXA which prescribes the space development is only for the peaceful purpose. This is based on a resolution of House of Representatives plenary session in 1969, and this peaceful purpose limits the space development to "non-military" affairs in Japan. The Space Fundamental Law is aimed for improvement of nation life, economic social development, world peace and improvement of the welfare of the human based on the following ideas: <ul style="list-style-type: none"> The peaceful use of space, it means "non-aggression" instead of "non-military", in accordance with the Space Treaty. Reinforcement of technical power and competition in the international market of a space industry International cooperation about space development General security Realization of a dream of the human and development of human society Protection of Earth environment This law prescribes further that the Prime Minister installs "Space Development Strategy Headquarters", establishes "Space Basics Plan" and reviews space development organizations including JAXA. If this law is established, the Japanese environment of space development would show an aspect different from the present situation and become much more active than the present. </div> <div> <p>*Wideband InterNetworking engineering test and Demonstration Satellite</p> </div> |

ICSSC2011 <ul style="list-style-type: none"> In the case of taking place in Japan or Asia <ul style="list-style-type: none"> Need more time to discuss its possibilities Need increase the number of participants from U.S.A., because Americans' presence is very important to show the U.S.A.'s strong support. Otherwise, it will be difficult that Japanese side make effort to take place it in Japan or Asia. </div> |
| <div>  <p>The World's Forum for Aerospace Leadership</p> </div> <div> <h3>Article VII</h3> </div> <div> <p>< Article VII > Officers (1) The officers of the AIAA-JFSC shall consist of Chairperson, Vice chairpersons, Secretary, Vice secretary, Treasurer, Publication Officer, Honors & Awards Officer, Academy relation & Exhibition Officer, International Relations Officer, and Auditor. The board of officer shall consist of all members of the officers except chairperson, vice chairperson and auditors. (2) All officers shall be elected at the Annual General Meeting which consists of the members of AIAA-JFSC of all grades. (3) Auditor shall be independent from board of officer in order to keep his/her position neutral. (4) All officers shall have responsibility for terms of two years. However, recommitment is not prohibited. (5) Chairperson The Chairperson shall be the chief executive officer of the AIAA-JFSC. He/She shall preside at all meetings and functions of the AIAA-JFSC and represent the AIAA-JFSC in dealing with outside agencies. (6) Vice-chairperson The Vice chairpersons shall be responsible for conducting the detailed planning and shall support the chairperson in all occasion. (7) Secretary The secretary shall conduct the correspondence of the AIAA-JFSC and shall be responsible for sending out all notices of the meetings. He/she shall report major activities of AIAA-JFSC to the AIAA TCSCS. Secretary is responsible to perform the business of the AIAA-JFSC in daily basis. Vice secretary shall support the secretary in all occasion. (8) Treasurer The treasurer shall have charge of the finances of the AIAA-JFSC and shall make all required financial reports and financial plans and such expenditures reports as should be authorized by general meeting. (9) Publication Officer The publication officer is responsible for the preparation and distribution of all AIAA-JFSC publications including the Space Japan Review. The editorial committee is headed by the publication officer.</p> </div> | <div>  <p>The World's Forum for Aerospace Leadership</p> </div> <div> <h3>Appendix</h3> </div> <div> <p>Draft Revision Bylaw of the AIAA Japan Forum on Satellite Communications Revised in April, 2007</p> </div> |
